

CWVC 90

NONIONIC LOW FOAM WETTER/SPREADER ADJUVANT

GENERAL PRODUCT DESCRIPTION

CWVC 90 is a nonionic general purpose spreader sticker spray adjuvant. CWVC 90 is specifically designed to optimize herbicide and other chemical applications for aquatic, roadside, utility, forestry, and other industrial applications.

DIRECTIONS FOR USE

Shake well before using.

Always add CWVC 90 to the spray tank with the agitator running. Always read and follow all directions, mixing instructions, and precautionary statements of the pesticide label that is to be tank mixed with CWVC 90.

SUGGESTED USE RATES

Usage rates of CWVC 90 may vary depending on the conditions of the application, including but not limited to pesticide formulation, temperature and humidity, spray application equipment, desired volume of spray mix per acre, and type of plant foliage to cover.

Herbicides

CWVC 90 is a highly effective aid to the application of both selective and non-selective pesticides for the control of nuisance herbaceous plants and grasses. Herbicide sprays containing chenoxy and methanearsonate compounds when applied on hard-to-wet plants will benefit from the addition of CWVC 90.

4-8301776 Rev. 7-08

ACTIVE INGREDIENTS:

Ethoxycelid acrylate, ethoxycelid fatty acids, and polyoxyethylene ether	90%
Dimethylsulfoniethylamine Spray Adjuvant	10%
TOTAL	100%

CAUTION: May cause skin and eye irritation. Harmful if swallowed. KEEP OUT OF REACH OF CHILDREN.

DIRECTIONS FOR USE

Type of Foliage Application	Per 100 gallons
Utility Spikes-on-line	1/2 pint - 2 quarts
Roadside Foliar	1-2 quarts
Forest Site Preparation	1/2 pint - 2 quarts
Aquatic Surfaces	1-2 gallons
Aquatic Submerged	
Application / Turf	1/2 - 2 pints

NET CONTENTS 2 x 2.5 Gallons (2 x 9.45 liters)
