

FLAGLER COUNTY - FLORIDA

Florida Department of Transportation District 5 Primary Roadway Maintenance

DBi Services has provided complete fence-to-fence performance-based asset maintenance services for FDOT District 5 within Flagler County and parts of Volusia County since January 2012. The project is contracted through 2019.

This project consists of 287 lane miles of urban and rural arterial roadways, as well as 128 raised structures and a Weigh-in-Motion Station (WIMS).

Additionally, this project requires a high level of vegetation and aesthetics maintenance due to the prominent cities of Palm Coast and Flagler Beach within the project boundaries.

DBi Services is responsible for 24/7/365 accident and emergency response throughout the project corridor including coordination of resources working with the FDOT traffic control centers, as well as all police agencies and Traffic Incident Management Systems (TIMS).

Project Highlights

Prior to DBi Services providing operations and maintenance for the primary roadways, the City of Bunnell performed these services through a contract with FDOT. During mobilization, DBi Services implemented a transition plan to facilitate a seamless transfer of responsibilities and operations from the City of Bunnell to DBi Services. Additionally, City of Bunnell employees that may have been displaced were given priority while staffing the project team.

The project's coastal roadways present various maintenance challenges. DBi Services continuously mitigates erosion issues, especially during the busy tourist season. This ensures the safety of the traveling public as well as keeps roadway damage to a minimum.

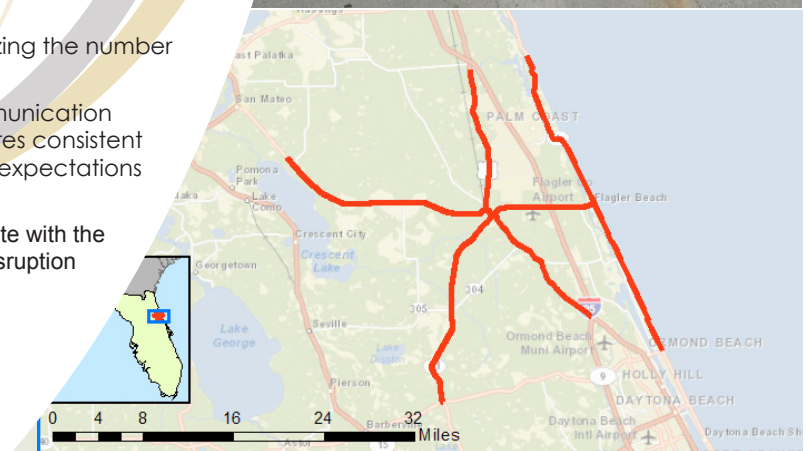

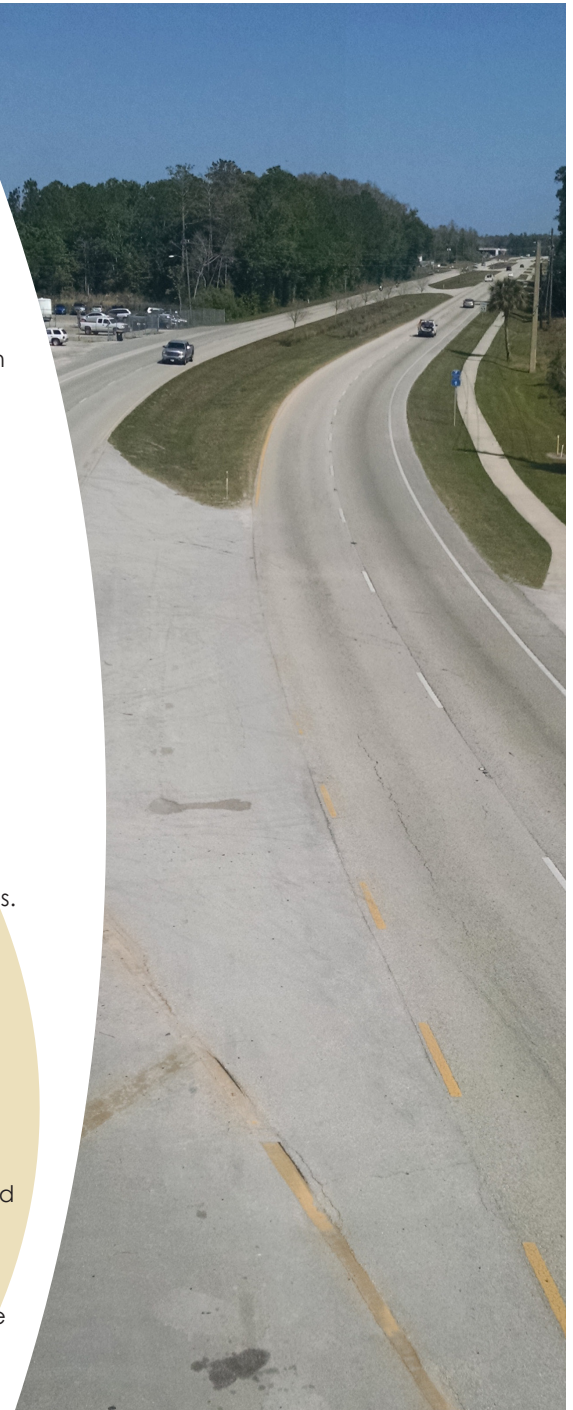

Additionally, DBi Services works closely with various local environmental groups during sea turtle nesting season.

Relevant Experience Gained

- With only six weeks to mobilize, DBi Services' project team was fully staffed, equipped, trained and prepared to hit the road running.
- Coordination with the City of Bunnell for transition of services resulted in the transfer of legacy employees and the retaining of institutional knowledge.
- DBi Services' management of emergency services has been highlighted by our successful and commended response to multiple simultaneous accidents.

Value to Customer

- Bundled operations and maintenance minimizing the number of contractors and oversight needed.
- DBi Services has well-established lines of communication with FDOT District 5 management, which ensures consistent information exchange and knowledge of the expectations and preferred methods of the District.
- DBi Services works on behalf of FDOT to coordinate with the local beach ecological groups to ensure minimal disruption along US A1A.
