

US 27 AND BELLE GLADE AREA - FLORIDA

Florida Department of Transportation . District 4 State Highway Asset Maintenance

PROJECT OVERVIEW

DBi Services provides comprehensive asset management and maintenance of state highways in western Palm Beach, Broward, Martin and Okeechobee Counties within FDOT District 4.

DBi Services effectively managed the initial Belle Glade Asset Maintenance Contract for District 4 from 2003 through 2010 and successfully won a rebid under which we will operate and maintain this infrastructure through 2017.

This project consists of 189 centerline miles and was the first project of its kind to provide FDOT offices for the contractor's use and to utilize Department of Corrections inmate labor to perform right-of-way maintenance activities for a private contractor.

DBi Services provides incident and emergency response, traffic control and direct coordination with District 4's Traffic Operations Center.

Project Highlights

DBi Services performed and managed all clean-up and repairs to FDOT assets within the project area after hurricanes Frances, Jeanne and Wilma, and worked with FDOT consultants on submissions to FEMA and FHWA on its federally reimbursed funds.

DBi Services successfully operated this project since 2004 with an average MRP score of 87 and an average AMPER score of 94.

DBi Services was the first asset maintenance company in FDOT's asset management history to get an 'Excellent' rating on a Quality Assurance Review from the state of Florida, with a perfect score of 100.

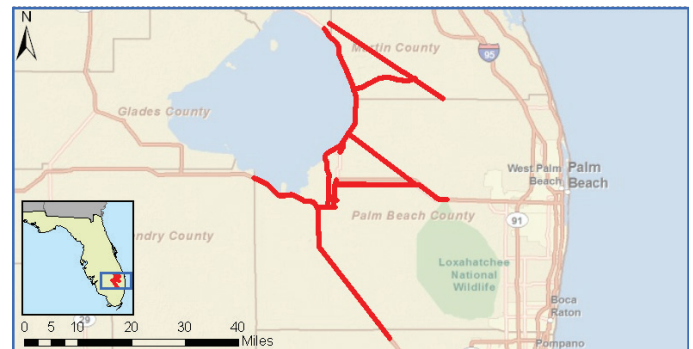

DBi Services has met all time limit requirements for incident response since the inception of the contract. One major accident involved 11 tractor trailers, 3 passenger vehicles, a fire, a trapped motorist, and spilled rock and fuel, for which DBi Services re-opened the road in 12 hours.

Relevant Experience Gained

- DBi Services has been managing and maintaining these roadways since 2004, and developed extensive operational experience in dealing with many issues significant to FDOT projects including invasive species management, as well as integrated emergency response with local agencies and first responders.
- DBi Services gained valuable catastrophic event experience managing the preparation and recovery for a number of hurricanes, as well as assisting the Department to prepare FHWA reporting.
- DBi Services is instrumental in protecting the traveling public from limited visibility due to smoke, fog and wild fires.

Value to Customer

- DBi Services has received numerous awards from the Palm Beach County Sheriff's office for exceptional cooperation in incident management and leadership in emergency response.
