Mining Massive Data Sets for Security Françoise Fogelman-Soulié 2008-01-01 The real power for security applications will come from the synergy of academic and commercial research focusing on the specific issue of security. Special constraints apply to this domain, which are not always taken into consideration by academic research, but are critical for successful security applications: large volumes: techniques must be able to handle huge amounts of data and perform 'on-line' computation; scalability: algorithms must have processing times that scale well with ever growing volumes; automation: the analysis process must be automated so that information extraction can 'run on its own'; ease of use: everyday citizens should be able to extract and assess the necessary information; and robustness: systems must be able to cope with data of poor quality (missing or erroneous data). The NATO Advanced Study Institute (ASI) on Mining Massive Data Sets for Security, held in Italy, September 2007, brought together around ninety participants to discuss these issues. This publication includes the most important contributions, but can of course not entirely reflect the lively interactions which allowed the participants to exchange their views and share their experience. The bridge between academic methods and industrial constraints is systematically discussed throughout. This volume will thus serve as a reference book for anyone interested in understanding the techniques for handling very large data sets and how to apply them in conjunction for solving security issues.

Self-Confrontation A Manual for In-Depth Biblical Discipleship John C. Broger 1991-10-01 The purpose of this manual is to teach you how to examine yourself biblically so you can live in a manner that pleases the Lord and help others to do the same. The material in this manual also has been used in Bible studies for youth and adults, classes for Christian students (junior high, high school, college, and seminary level), courses of study designed to prepare missionaries for their ministry, evangelism training, discipleship training in prison ministries, Sunday school classes, home group studies, personal devotional studies, and Scripture memorization programs. In addition, it has proved valuable as a resource for pastors, counselors, health care professionals, personnel managers, educators, social workers and other professionals who are responsible to deal with personal and interpersonal problems. As you progress through this manual, you will discover many other uses for this material in your life and personal ministry. Please do not be intimidated by the volume of Scripture references contained in this manual. A new believer in Jesus Christ can find great comfort and help from looking up only one verse out of many that are listed on a particular subject. On the other hand, the Bible scholar or seminary student may desire to research many of the Scripture references from the original languages of the Bible. No matter how proficient you are in using Scripture, this manual encourages you to rely on the Word of God to discover God's sufficiency for every aspect of your life.
