The Misfit Economy Alexa Clay 2015-06-23 A book that argues that lessons in creativity, innovation, salesmanship, and entrepreneurship can come from surprising places: pirates, bootleggers, counterfeiters, hustlers, and others living and working on the margins of business and society. Who are the greatest innovators in the world? You're probably thinking Steve Jobs, Thomas Edison, Henry Ford. The usual suspects. This book isn't about them. It's about people you've never heard of. It's about people who are just as innovative, entrepreneurial, and visionary as the Jobses, Edisons, and Fords of the world. They're in the crowded streets of Shenzhen, the prisons of Somalia, the flooded coastal towns of Thailand. They are pirates, computer hackers, pranksters, and former gang leaders. Across the globe, diverse innovators operating in the black, grey, and informal economies are developing solutions to a myriad of challenges. Far from being "deviant entrepreneurs" that pose threats to our social and economic stability, these innovators display remarkable ingenuity, pioneering original methods and practices that we can learn from and apply to move formal markets. This book investigates the stories of underground innovation that make up the Misfit Economy. It examines the teeming genius of the underground. It asks: Who are these unknown visionaries? How do they work? How do they organize themselves? How do they catalyze innovation? And ultimately, how can you take these lessons into your own world?

Women Writing the Nation Leanne Maunu 2007 Women Writing the Nation: National Identity, Female Community, and the British - French Connection, 1770-1820 engages in recent discussions of the development of British nationalism during the eighteenth century and Romantic period. Leanne Maunu argues that women writers looked not to their national identity, but rather to their gender to make claims about the role of women within the British nation. Discussing texts by Frances Burney, Charlotte Smith, Mary Wollstonecraft, and others in the late-eighteenth and early-nineteenth centuries, Maunu demonstrates that women writers of this period imagined themselves as members of a fairly stable community, even if such a community was composed of many different women with many different beliefs. They appropriated the model of collectivity posed by the nation, mimicking a national imagined community.

Elliptic Functions and Elliptic Curves Patrick Du Val 1973-08-02 A comprehensive treatment of elliptic functions is linked by these notes to a study of their application to elliptic curves. This approach provides geometers with the opportunity to acquaint themselves with aspects of their subject virtually ignored by other texts. The exposition is clear and logically carries themes from earlier through to later topics. This enthusiastic work of scholarship is made complete with the inclusion of some interesting historical details and a very comprehensive bibliography.

AI and education Holmes, Wayne 2021-04-08 Artificial Intelligence (AI) has the potential to address some of the biggest challenges in education today, innovate teaching and learning practices, and ultimately accelerate the progress towards SDG 4. However, these rapid technological developments inevitably bring multiple risks and challenges, which have so far outpaced policy debates and regulatory frameworks. This publication offers guidance for policy-makers on how best to leverage the opportunities and address the risks, presented by the growing connection between AI and education. It starts with the essentials of AI: definitions, techniques and technologies. It continues with a detailed analysis of the emerging trends and implications of AI for teaching and learning, including how we can ensure the ethical, inclusive and equitable use of AI in education, how education can prepare humans to live and work with AI, and how AI can be applied to enhance education. It finally introduces the challenges of harnessing AI to achieve SDG 4 and offers concrete actionable recommendations for policy-makers to plan policies and programmes for local contexts. Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the

role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Coacoochee's Bones Susan A. Miller 2003 "A man born to an elite family, Coacoochee used the power of his status in creative ways, and Miller uses his career to explain his leadership in terms of Seminole knowledge and governmental structure, showing that Coacoochee's concept of leadership was linked as closely to spiritual as to political or military imperatives. Her account offers a more nuanced understanding of the Seminole cosmos - particularly the reality governing Coacoochee's awareness of his own tribe's circumstances - and of long-standing borderlands disputes. She draws on Seminole, American, and Mexican sources to help untangle the histories of various emigrant tribes to the borderlands. She also examines the status of Seminoles today in light of the suppression of Coacoochee's story, including modern Seminole's attempts to recover their lost homeland at El Nacimiento."--BOOK JACKET.

Williwaw Gore Vidal 2003-06-18 A gripping tale of men struggling against nature and themselves, Williwaw was Gore Vidal's first novel, written at nineteen when he was first mate of the U.S. Army freight supply ship stationed in the Aleutian Islands. Here he writes of a ship caught plying the lethal, frigid Arctic waters during storm season. Tensions run high among the edgy crew and uneasy passengers even before the cruel wind that gives the book its title suddenly sweeps down from the mountains. Vividly drawn characters and a compelling murder plot combine to make Williwaw a classic war novel.

Student's Guide to Writing Dissertations and Theses in Tourism Studies and Related Disciplines Tim Coles 2012-12-14 "Around the world every year many thousands of students have to complete dissertations or theses as part of their undergraduate or masters studies in tourism and related subjects. Often the dissertation or thesis represents the culmination of their programme as a substantial piece of self-directed work. More than just a means to consolidate their final grade, it is also an exciting chance to conduct intensive research on a topic of their choosing. It can also be a gateway to further periods of study as well as job offers and future career paths. Yet for all these reasons, the dissertation is viewed by many students as a tricky challenge. This book intends to take the stress and anxiety out of doing a dissertation in tourism studies and related disciplines. The dissertation process is examined from the germination of an idea to the submission, presentation and assessment of the final document. We offer a framework for conducting dissertations in the English-speaking world which students can adopt to varying degrees in their research at the undergraduate and masters levels. We aim to debunk the popular myths and common pitfalls of doing a dissertation. Rather than view the dissertation as a single, overwhelming project, the dissertation is presented as a series of more modest, manageable yet crucially inter-linked tasks that all students can successfully complete through effective time management"--

Recommender Systems for Learning Nikos Manouselis 2012-08-28 Technology enhanced learning (TEL) aims to design, develop and test sociotechnical innovations that will support and enhance learning practices of both individuals and organisations. It is therefore an application domain that generally covers technologies that support all forms of teaching and learning activities. Since information retrieval (in terms of searching for relevant learning resources to support teachers or learners) is a pivotal activity in TEL, the deployment of recommender systems has attracted increased interest. This brief attempts to provide an introduction to recommender systems for TEL settings, as well as to highlight their particularities compared to recommender systems for other application domains.

Open Learning Cultures Ulf-Daniel Ehlers 2013-09-12 Today we are seeing a new form of blended learning: not only is technology enhancing the learning environment but formal and informal learning are combining and there is self- and peer-assessment of results. Open learning cultures are challenging the old and long-practiced methods used by educators and transforming learning into a more student-driven and independent activity, which uses online tools such as blogs, wikis or podcasts to connect resources, students and teachers in a novel way. While in higher education institutions most assessments are still tied to formal learning scenarios, teachers are more and more bound to recognize their students' informal learning processes and networks. This book will help teachers, lecturers and students to better understand how open learning landscapes work, how to define quality and create assessments in such environments, and how to apply these new measures. To this end, Ehlers first elaborates the technological background for more collaborative, distributed, informal, and self-guided learning. He covers the rise of social media for learning and shows how an architecture of participation can change learning activities. These new paradigms are then applied to learning and education to outline what open learning landscapes look like. Here he highlights the shift from knowledge transfer to competence development, the increase in lifelong learning, and the importance of informal learning, user generated content, and open educational resources. He then shows how to manage quality by presenting a step by step guide to developing customized quality concepts for open learning landscapes. Finally, several methods dealing with assessment in these new environments are presented, including guidelines, templates and use cases to exemplify the approaches. Overall, Ehlers argues for assessment as an integral part of learning processes, with quality assurance as a method of stimulating a quality culture and continuous quality development rather than as a simple controlling exercise.

The French Parlements and the Crisis of the Old Regime Bailey Stone 1986 "The predominant twentieth-century view of the French Revolution stresses the socioeconomic causes of this upheaval and argues that it began as an aristocratic class insurgency during 1787-88. Bailey Stone challenges this theory by showing that the parlements, the high judicial bodies that exercised the royal powers of justice, neither initiated nor sustained an aristocratic insurgency against the crown. In reality, they championed the traditional balance of social and political forces in France." -- Page 2 of cover.
