Driven by Difference David Livermore 2016-02-17 Today's board rooms, think tanks, and staff lounges are more diverse than ever before. But these cultural differences can either lead to gridlock among stubborn, single-minded thinkers or they can catalyze innovation and growth among an expansive team of creative, distinctive individuals. Diverse teams are far more creative than homogenous teams--but only when they are managed effectively. Driven by Difference identifies the management practices necessary to minimize conflict while maximizing the informational diversity found in varied values and experiences. Drawing on the cultural intelligence, or CQ, of diversity success stories from Google, Alibaba, Novartis, and other groundbreaking companies, this must-have resource teaches managers of diverse groups how to:

- Create an optimal environment
- Consider the various audiences when selecting and selling an idea
- Design and test for different users
- Fuse differing perspectives
- Align goals and expectations
- And more

New perspectives and talents have joined your company's ranks in recent years. Are you seeing the increased innovation and success that should be resulting from such diversity?

The Book on the Bookshelf Henry Petroski 2010-12-01 From the author of the highly praised The Pencil and The Evolution of Useful Things comes another captivating history of the seemingly mundane: the book and its storage. Most of us take for granted that our books are vertical on our shelves with the spines facing out, but Henry Petroski, inveterately curious engineer, didn't. As a result, readers are guided along the astonishing evolution from papyrus scrolls boxed at Alexandria to upright books shelved at the Library of Congress. Unimpeachably researched, enviably written, and charmed with anecdotes from Seneca to Samuel Pepys to a nineteenth-century bibliophile who had to climb over his books to get into bed, The Book on the Bookshelf is indispensable for anyone who loves books.

Shadow Work Craig Lambert 2015-05-01 With the exception of sleep, humans spend more of their lifetimes on work than any other activity. It is central to our economy, society, and the family. It underpins our finances and our sense of meaning in life. Given the overriding importance of work, we need to recognize a profound transformation in the nature of work that is significantly altering lives: the incoming tidal wave of shadow work. Shadow work includes all the unpaid tasks we do on behalf of businesses and organizations. It has slipped into our routines stealthily; most of us do not realize how much of it we are already doing, even as we pump our own gas, scan and bag our own groceries, execute our own stock trades, and build our own unassembled furniture. But its presence is unmistakable, and its effects far-reaching. Fueled by the twin forces of technology and skyrocketing personnel costs, shadow work has taken a foothold in our society. Lambert terms its prevalence as "middle-class serfdom," and examines its sources in the invasion of robotics, the democratization of expertise, and new demands on individuals at all levels of society. The end result? A more personalized form of consumption, a great social leveling (pedigrees don't help with shadow work!), and the weakening of communities as robotics reduce daily human interaction. Shadow Work offers a field guide to this new phenomenon. It shines a light on these trends now so prevalent in our daily lives and, more importantly, offers valuable insight into how to counter their effects. It will be essential reading to anyone seeking to understand how their day got so full—and how to deal with the ubiquitous shadow work that surrounds them.

Postcards from Penguin Penguin 2010-09-15 A collection of 100 postcards, each featuring a different and iconic Penguin book jacket. From classics to crime, here are over seventy years of quintessentially British design in one box. In 1935 Allen Lane stood on a platform at Exeter railway station, looking for a good book for the journey to London. His disappointment at the poor range of paperbacks on offer led him to found Penguin Books. The quality paperback had arrived. Declaring that 'good design is no more expensive than bad', Lane was adamant that his Penguin paperbacks should cost no more than a packet of cigarettes, but that they should always look distinctive. Ever since then, from their original - now world-famous - look featuring three bold horizontal stripes, through many different stylish, inventive and iconic cover designs, Penguin's paperback jackets have been a constantly evolving part of Britain's culture. And whether they're for classics, crime, reference or prize-winning novels, they still follow Allen Lane's original design mantra. Sometimes, you definitely should judge a book by its cover. Communication, Control, and Computer Access for Disabled and Elderly Individuals Dale Bengston 1987 One of a series of three resource guides concerned with communication, control, and computer access for the disabled or the elderly, the book focuses on hardware and software. Making is Connecting David Gauntlett 2018-05-21 SECOND UPDATED EDITION, WITH THREE ALL-NEW CHAPTERS The first edition of Making is Connecting struck a chord with crafters, YouTubers, makers, music producers, artists and coders alike. David Gauntlett argues that through making things, people engage with the world and create connections with each other. Online and offline, we see that people want to make their mark, and to make connections. This shift from a 'sit-back-and-be-told culture' to a 'making-and-doing culture' means that a vast array of people are exchanging their own ideas, videos, and other creative material online, as well as engaging in real-world crafts, music projects, and hands-on experiences. Drawing on evidence from psychology, politics, philosophy, and economics, Gauntlett shows that this

everyday creative engagement is necessary and essential for the happiness and survival of modern societies. This fully revised second edition includes many new sections as well as three brand new chapters on creative processes, do-it-yourself strategies, and platforms for creativity.
