John Blockley – A Retrospective Ann Blockley 2018-10-26 John Blockley was one of Britain's most outstanding watercolour and pastel painters of the late 20th century, and has exhibited at the Royal Academy. Self-taught, he produced work that has always been experimental and progressive. His highly textured style was well ahead of his time and still hugely influential now. The quality of his work is even more staggering given that he never trained at any art college, and spent most of his working life as an engineer. He only started painting full time at the age of 52. His obsession for drawing and painting, even while a successful engineer, was driven by his search for the essence of his subjects. The power of his paintings reveal that passion. This beautiful retrospective of his work, including drawings, watercolours, pastels and also acrylics, brings together the best of his work. The illuminating commentary on his work is from his daughter, Ann Blockley, who is also an acclaimed painter in her own right. She understands completely where John Blockley was coming from in his artistic vision and also explains the techniques he used. Breaking with so many traditions in watercolour painting in the 1960s, John was and is an influential figure in the art world. John said, 'In order to paint the terrain as I see it – blotched, mottled, grainy – I must experiment'. These experimentations are still of huge value to painters today. This book is perfect for any painter who enjoys John's work but also for all the many, many fans of his work. Sowerby's Road Garry Sowerby 2004-07 About many fun and gruelling road trips, this book chronicles many of Garry Sowerby's adventures, the people he meets, and the sometimes bizarre situations and places he gets himself into and out of. It doles out 50 tales that pack an invigorating escape from the everyday. The stories include tales in Texas, New York, Alaska, Labrador, and more.

Supermarine Spitfire Restoration Manual Paul Blackah 2014-02-01 The Spitfire remains one of the most iconic combat aircrafts of all time and to own an airworthy example of this classic fighter is the Holy Grail for many wealthy Warbird collectors. For an aircraft that first flew more than 70 years ago and which went out of production in the early 1950s, it may seem odd to discover that there is a flourishing industry centered on this aircraft in the 21st century. Scratch-building brand new Spitfires or restoring original examples to airworthy condition has become big business, with aircrafts changing hands for several million dollars apiece. Husband and wife author team Paul and Louise Blackah look into what is required to find a Spitfire that's suitable for restoration and then return it to the skies. With Paul's vast experience in restoring and maintaining the RAF BBMF's Spitfires, and both Paul and Louise's contacts in the aircraft restoration community, this promises to be a unique look inside the world of Spitfire building and restoration in the 21st century.
